

Quality Policy

The Company quality system covers the provision of water & waste water measurement services and Equipment manufacture and supply, asset investigation and survey above and below ground, geomatic survey and data capture services in environmental & infrastructure sector including the construction, utility and rail industries.

The management system applies to all locations.

It is the policy of The Company to provide our customers with services which meet customer requirements, any applicable and statutory requirements and code of practice, etc.

We seek to continually improve the effectiveness of this Quality Management System, which is reviewed during our management review meetings, when we also review our quality objectives. We establish new objectives, wherever our system may benefit from doing so.

The ongoing suitability of this Quality Policy is reviewed during the Quality management review meetings.

This Quality Policy is available to all employees on our computer network and a copy is prominently displayed in a public area of the building.

The Company supplies a range of standard products and services to meet customer needs. The scope of our Quality System does not, therefore, include Design and Development Control Procedures.

Stuart Learmonth
Managing Director
